

## **Illustrative “Positive List” of Ingredients**

This is a list of commonly used ingredients for natural personal care and home care products under the NPA Natural Standard. These ingredients may be allowed because they meet the NPA definition of natural under the NPA Natural Standard. As indicated, this list is illustrative and even though an ingredient is included on this list, it may not be accepted in all available forms. For some examples, NPA will need documentation that the ingredient has been sourced naturally and processed within the list of allowed processes.
